

I created an account on **HackerRank** (username: KUNAL SHARMA) and completed the "**Solve Me First**" beginner challenge in Python. This problem teaches function input/output basics: given a and b, return a + b. My solution passed all 4 test cases with 100% score.

What I practiced: Basic Python functions, input parsing (int(input())), and logical thinking.

Screenshot: hackerrank.png and hackerrank1.png to task-3-platforms/ showing code submission and "Accepted" verdict.

Google Workspace Collaboration

Built "**Digital Literacy Awareness Quiz**" Google Form with **5 questions**:

1. **Multiple Choice:** What is digital literacy? (B: Using tools safely)
2. **Checkboxes:** Cybersecurity practices (3 correct)
3. **Multiple Choice:** Spotting fake news
4. **Short Answer:** Risk of oversharing
5. **Checkboxes:** Verification tools

Academic Impact

HackerRank builds **daily coding habit** for Data Structures/AI courses; Google Forms enables **batchmate surveys** for projects (e.g., AI ethics polls). Together, they sharpen **problem-solving** and **collaboration skills**. **Screenshot evidence proves completion**
