

DIGITAL LITERACY PROJECT REPORT

KUNAL SHARMA

25BCE11303

B.Tech Computer Science Engineering, SEMESTER-2

VIT Bhopal

29 MARCH 2026

INTRODUCTION

This project demonstrates comprehensive digital literacy skills required for modern computer science students. Across five tasks, I created professional digital assets including an infographic, portfolio platforms, coding challenges, communication templates, and cybercrime awareness resources.

Building online presence, collaborating professionally, coding competitively, communicating effectively, and staying safe online

All deliverables are organized in GitHub repository folders:

task-1-presentation/, task-2-portfolio/, task-3-platforms/, task-4-email-etiquette/, and task-5-cybercrime/.

TASK 1: INFOGRAPHIC PRESENTATION

Design Content: Single infographic covering **digital literacy definition** (3 pillars), **India's digital proficiency growth** (2012-2025 chart), **safety rules** (5 Don'ts), **student pro tips**.

File: INFOGRAPHIC-SLIDE.pdf in task-1-presentation/.

Challenge: Prezi's non-linear path animation required precise timing between chart → safety → tips sections, teaching visual hierarchy planning valuable for UX/UI design.

TASK 2: DIGITAL PORTFOLIO

Platforms: GitHub, LinkedIn, Kaggle

- **GitHub:** Profile README with name, BCE branch, 1st year, AI/ML goals
- **LinkedIn:** B.Tech CSE, VIT Bhopal (2029 graduation)
- **Kaggle:** Python/ML profile, Titanic competition

Screenshots: task-2-portfolio/ folder

4-Year Plan: Daily GitHub coding, monthly LinkedIn networking, weekly Kaggle competitions

TASK 3: CODING & COLLABORATION

Coding: HackerRank "Solve Me First" Python challenge completed (100% score)

Google Form: 5-question Digital Literacy Quiz (2 MCQ, 2 checkboxes, 1 short answer)

Form Link: (README)

Screenshots: task-3-platforms/

Impact: Daily coding practice and batchmate survey capability for projects

TASK 4: PROFESSIONAL COMMUNICATION

Emails: Extension request + internship application (task-4-email-etiquette/)

Social Media: 5 Do's/5 Don'ts checklist (social-media-checklist.md)

Learning: 2023 airline Twitter crisis—sarcastic tweet caused 15% stock drop. **Fix:** Two-person approval and 60-second pause rule.

TASK 5: CYBERCRIME AWARENESS

Case Study: UPI Fraud targeting students (casestudy.txt)

Checklist: 10 safety tips incl. UPI biometric lock (prevention-checklist.md)

Surprise: Students lost ₹300 crore in 2025 due to poor 1-hour reporting

New Habit: Fingerprint UPI lock and 1930 speed dial

CONCLUSION

This project created a complete digital literacy portfolio proving readiness.

Key takeaway: platform synergy (GitHub→Kaggle→LinkedIn) and **UPI fraud awareness** (₹300 crore student losses). I'll maintain daily HackerRank, monthly networking, biometric UPI security permanently.
